HOW UNDERTONES WORK

Undertones are the subtle hues beneath a color.

They influence how colors feel
and what pairs well together.

WARM (yellow, peach, golden)
NEUTRAL (balanced)
COOL (blue, pink, gray)

Tip: Look at neutrals in natural
light and next to each other
to see undertones.

HOW UNDERTONES AFFECT PAIRINGS

- Warm + Warm = Harmonious & Cozy**
(Golden undertones work beautifully together.)
- Cool + Cool = Crisp & Calm**
(Blue or gray undertones create a serene feel.)
- Warm + Cool = Balanced & Collected**
(Neutrals bridge both sides for a layered, livably look.)
